Allowable Subject Matter

Claims 1-6, 8-14, 16-22, 24-30, and 32 are allowable over prior art of record; renumbered as claims 1-28.

The following is an examiner's statement of reasons for allowance: The cited prior art (US 6149323 to Shima) of record teaches a printer driver for selecting setting values (i.e. print job attributes) and stored as a setting value file, but the prior art of record fails to teach and/or suggest "addition means for, when the combined setting selected by said selecting means includes the setting value of the predetermined setting item registered by said item setting registration, adding a temporary option to the item setting list and for assigning the temporary option to the setting value of the predetermined setting item included in the combined setting so that the combined setting temporary utilizes the setting value of the predetermined setting item ***and in combinations of other features***" as cited in independent claims 1, 9, 17, and 25. The examiner found neither prior art cited in its entirety, nor based on the prior art, found any

motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in independent claims 1, 9, 17, and 25.
